

Outdoor Table in a Bag Instructions

Instructions

Loosen the top of the bag.

Take all of the pieces.

Lay the tabletop down on the ground upside down so you can see the staples.

Pick a side to start on. Align the holes of the crossbars with two of the holes of the tabletop. The other side of the tabletop will not appear to match the screw holes of the crossbars - it has to be stretched out slightly.

Insert two legs into your chosen side and screw them in loosely.

Stretch the table out (this may require an additional person to help you) and partially screw in the other two legs.

Once all of the legs are partially screwed in, fully screw all of the legs in.

Turn the table over and enjoy!

Follow these instructions in reverse to take apart.
