PS5 console set up & activation

1. **<u>ATTENTION: Do Not Unplug The Console While It Is On, This Will Damage The System. As Per Our General Policy, This May Result In A Fee Being Charged To Your Account.</u>**

   If the console freezes, hold down the main power button on the system for as long as needed until it shuts off. Wait 5 mins after it's been completely turned off before turning back on.

2. Attach the stand to the PS5 console according to the laminated instruction slip.

3. The external hard drive that's included can store PS4 games. It needs to be **plugged into the rear USB port** of the system, **it will not function at all** if plugged into the front USB port of the system.

4. Turn on the PS5 console by either pressing the power button on the far left side of the system or by turning on one of the controllers by pressing the PS button located on the lower middle section of said controller. Both controllers are already paired to the system.

Power Button

5. Insert a PS5 disc and it should automatically install on the console's internal storage. If a PS4 disc is inserted, it should install on to the connected external hard drive. PS5 titles can't play off the external HDD and should stay on the console's internal storage.

6. **Under no circumstances** should anything be purchased on the console via any digital storefront nor personal accounts be logged into any video streaming service.

What will you play!

Have fun on the Lincolnwood Library Playstation 5 video game console.
